Attestation & Authoritative References

This Coverage Statement documents assertion-level risk coverage per ISA 315 (Revised 2019) ¶A128 and the ISA 315 IT-Environment appendices.

Coverage designations against relevant assertions align with PCAOB AS 2301 ¶08 (The Auditor's Responses to the Risks of Material Misstatement).

Evidence drill-downs preserve provenance of the underlying electronic information consistent with PCAOB AS 1105 ¶.10A (as amended 2025, technology-assisted analysis reliability).

Identified gaps carry a root-cause classification consistent with PCAOB QC 1000 §.15 (root-cause analysis of quality deficiencies).

This Coverage Statement is a management-produced artifact of Advisacor's automated close-review controls. It supplements, but does not substitute for, an external auditor's independent assessment of assertion-level risk.
